

NeoGrid Supply Chain Collaboration Suite

SC Visibility | SC Planning | SC Execution

Integrated platform synchronizing your supply chain end-to-end through collaborative workflow, configurable to match your partner relationship maturity

NeoGrid is a ONE STOP SHOP global cloud based Supply Chain Collaboration Suite. Our solutions enable our clients to simultaneously reduce out-of-stocks (OOS) and inventory levels.

NeoGrid delivers on average:

35%

reduction in out-of-stocks

30%

reduction in inventory

“The platform allows us to evolve easily as our customers’ forecasting and supply chain initiatives evolve. We no longer have to implement different solutions for different customer needs. NeoGrid allows us significant flexibility across the Bayer enterprise globally.”

Director of Logistics Systems & Services - Bayer

Why NeoGrid?

Seven reasons to connect to the NeoGrid network

1. Built for the Cloud

With hundreds of thousands of clients around the world, NeoGrid quickly connects partners through advanced solutions and services delivered exclusively through a secure cloud-based solution.

2. One Platform. Many Relationships

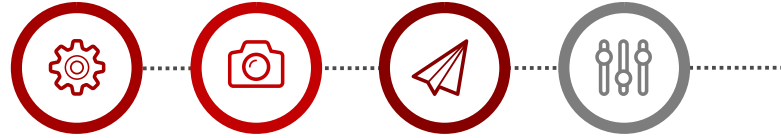

From simple data sharing to more complex collaboration processes, we add efficiency and optimize value across the entire supply chain by allowing you to easily manage all levels of relationships from ONE single platform.

3. Scalability to support the growth of your projects

Our collaboration-ready supply chain synchronization infrastructure is designed to grow and evolve as your needs do. We provide the resources and support to help you get more partners on board faster and easier.

4. Synchronization down to shelf level

Increase your supply chain responsiveness and collaboration through a truly demand-driven solution, integrating end-consumer demand at the retail store shelf all the way back up to production.

5. Beyond information. Intelligence and action

Go beyond data visibility and static reporting. Our solutions offer enhanced demand forecasting, accurate inventory recommendations and intelligent alerts — enabling you to take immediate action.

6. Dynamic perspectives, real control

Pre-packaged reporting, charts and KPIs coupled with the flexibility to create and customize your own as you go allows for dynamic perspectives and control — moving your business forward at the speed of the market.

7. RAPID Time to Value

With a unique pricing model, our secure cloud-based platform offers immediate cost advantages: specialized hands-on-training and rapid implementation processes with no additional equipment purchases will have your solution up and running in weeks — providing recognized value from the start.

Synchronize your end-to-end supply chain with a complete, demand-driven collaboration suite.
