Supply Chain Insights™

Invitation

Supply Chain 2030. How do we leaders prepare? It is our goal to stimulate new thinking. Together—through networking, case studies, research, and sharing of thought leadership presentations—we want to facilitate a new level of dialogue between line-of-business users and technology providers to tackle business problems and unleash the power of technology.

*Supply Chain Visionaries are invited to attend the **Supply Chain Insights Global Summit** on Sept 5-8, 2017. The event, now in its fifth year, will question the status quo and spark new dialogue. As a technologist, we encourage you to consider the sponsorship opportunities outlined in this document.*

Let us know how you want to be a part of this experience in a meaningful way...
